ende : In what his layings out or spéding by the Day, Weeke, and Yeare, are mesured.

Also by this a Generall may know how to maintaine an Army, a Merchant to discharge Sea-busines & a Nobleman to measure his layings out, or expences to profit.

A Table

THis Table, which needs no Description; first, readily sheweth the Interest of any Summe from 2 *s.* 6 *d.* to 900 *li.* for any time within a Yeare. Secondly, it is most vsefull and expedient for the casting vp of Interest arere, or behind, vpon forfeited Bonds, or accruing vpon seuerall payments of money. Thirdly, is right necessary as well for the Borrower as the Lender, whereby the one may know how much Interest he should pay, and the other what to receiue; and consequently neither of them doe, nor suffer iniury therein.

The benefit of the ensuing Table here layd open by these 3. *Questions following.*

1 TO know how much Money with the Interest, and Interest vpon interest, any summe of Money will amount vnto being put forth, or forborne for any number, or terme of yeares, not exceeding One and twenty.

2 To know how much any Rent or Annuitie will amount vnto, being forborne, or behinde; for any terme or number of yeares.

3 What any Rent or Annuity is worth in ready money, being to continue, or indure, for any terme, or time proposed.

All which are plainely exprest by diuers examples, in the next ensuing leaues.

To conclude, by the same Table you may value all Money, bargains for Lands, Leases, Annuities, Pensions, Rents in present possession, or in Reuersion with other Contracts, by the Gaine or Losse thereof, after the Rate of 8 *li. per cent.*

The same Table explained by example.

THis Table as you see containes 4. Columns: The first towards the left hand is the number of Yeares, for which a summe of Money is Lent or Forborne, beginning at 1. and ending at 21. and noted at the top, *Yeares.*

The second Column shews how much Money ought to be receiued for 1 *li.* set at Interest, or forborne for any number of yeares vnder 21. And the third shewes how much must be receiued for 2 *li.* and so of the rest.

The Explanation and Answer to the former 3. Questions.

1 By the first Question is knowne how much Money, with the Interest, and interest vpon Interest, any summe of

of money will amount vnto, being put forth, or forborne, for any number, or terme, of yeares.

As if it were required how much money ought there to be receiued for 1 *li.* at the ende of 7. Yeares ſet out at Intereſt vpon Intereſt.

Firſt, I ſeeke out the principall in the head of the Table, to wit, 1 *li.* and ſecondly, the Yeares in the ſide of the Table, ſo right againſt this 7 yeares, and right vnder 1 *li.* I finde 1 *li.* 14 *s.* 2 *d.* and ſo much ought there to be receiued at the ſaid end of 7 yeares.

In like manner, if 3 *li.* had beene ſet at Intereſt (for the ſaid terme of 7 yeares. The Intereſt and principall of the ſaid 3 *li.* would amount vnto 5 *li.* 2 *s.* 9 *d.*

Moreouer if 50 *li.* were put at Intereſt for 12 yeares, according to the former directions I ſeeke 50 *li.* in the head of the Table, and 12 yeares in the ſide of the Table, ſo right againſt this 12, and directly vnder 50 *li.* I finde 125 *li.* 18 *s.* and ſo much doth the Intereſt, and principall of 50 *li.* amount vnto, being ſet at intereſt for 12 yeares. And thus of all others : Note that if the principall propoſed bee not found in the head of the Table, take two Numbers there that will make it, and worke as before.

Secondly, by the ſecond Queſtion is known how much any Rent, or Annuitie will amount vnto being forborne, or behind, for any terme, or number of yeares.

As if you would know what 7 *li.* Annuitie, Rent, or Debt, being forborne, or behinde vnpaid for 5 yeares will amount vnto.

I firſt ſeeke out this principall 7 *li.* in the head of the Table, and vnto this 7 *li.* I add all the ſeueral ſummes which ſtand againſt the firſt foure yeares, to wit— And it makes in all 41 *li.* 1 *s.* 2 *d.* And ſo much doth 7 *li.* Annuitie, or Rent amount vnto, accounting Intereſt

7 *li.*	0 *s.*	0 *d.*
7	11	2
8	03	3
8	16	3
9	10	5
41	01	2

vpou

vpon Intereſt being forborne 5 yeares.

Moreouer, if a Rent, or Payment of 40 *li.* be forborne for 5 yeares, and it were required how much there ought to be Receiued at the ende of that Terme : Vnto this 40 *li.* I adde all the feuerall summes, which are againſt the first foure yeares, to wit ——— and which makes in all 234 *li.* 13 *s.* 4 *d.* and ſo much ought there to be receiued at the ende of 5 yeares: and ſo of any other, &c.

40 *li.*	0 *s.*	0 *d.*
43	04	0
46	13	1
50	07	9
54	08	4
234	13	4

Note that if a Rent or annuitie bee not found in the head of the Table, as admit it were a Rent of 47 *li.* be hinde for 5 yeares.

First I part it into two parts, which admit 40. and 7. Secondly, I feeke what 40 *li.* annuitie is worth, forborne 5 yeares, which according to the former direction would bee 234 *li.* 13 *s.* 4 *d.* the worth of that annuitie. Secondly I feeke in like manner 7 *li.* and finde it to bee 41 *li.* 1 *s.* 2 *d.* which two ſummes ſet together makes 275 *li.* 14 *s.* 6 *d.* and ſo much is 47 *li.* Rent, or annuitie being forborne 5 yeares, &c.

3 By the 3 queſtion is knowne what any Rent or annuity is worth in ready money, being to continue, or endure for any time, or terme propoſed.

As admit I haue a Rent, or yearely Penſion of 7 *li. per Annum*, to endure for 5 yeares, and am deſirous to ſell it for ready money.

First, I feeke the worth of this yearely Receipt, or Rent for the ſaid 5 yeares, according to the directions in the second Queſtion, which I finde to be 41 *li.* 1 *s.* 2 *d.*

Seconbly

Secondly, right againſt the 5 yeares in the Table, I ſeeke for this 41 *li.* 1 *s.* 2 *d.* but finding it not, I take the next leſſe ſumme againſt the ſaid 5 yeares, which will be 29 *li.* 7 *s.* 8 *d.* and right ouer it in the head of the Table I ſee 20 *li.* which I note downe in a voyd place, and alſo the ſayd 29 *li.* 7 *s.* 8 *d.* one againſt another, as here you ſee.

	li.	*s.*	*d*		*li.*	*s.*	*d*
	41	1	2	*li.*	*s.*	*d*	
Sub.	29	7	8	20	0	0	
Reſt	11	13	6				
Sub.	10	5	7	7	0	0	
Reſt	1	7	11	0	18	8	
The value in ready money.				27	18	8	

Thirdly, I Subſtract the ſaid 29 *li* 7 *s.* 8 *d.* from the aforeſayd 41 *li.* 1 *s.* 2 *d.* and there remaines 11 *li.* 13 *s.* 6 *d.* which I ſeeke (or the neereſt to it) likewiſe in the Table againſt the former 5 Yeares and finde neereſt vnto it 10 *li.* 5 *s.* 7 *d.* and ouer it in the head of the Table 7 *li.* This 7 *li.* place downe alſo vnder the 20 *li* and againſt the ſaid 10 *li.* 5 *s.* 7 *d.* Now taking this 10 *li.* 5 *s.* 7 *d.* from the former remainder 11 *li.* 13 *s.* 6 *d.* there remaines 1 *li.* 7 *s.* 11 *d.*

Laſtly, I ſeeke this laſt remainder in the Table againſt the former 5 Yeares, and find the neereſt vnto it 1 *l.* 9 *s.* 3 *d.* and at the head of the Table 1 *li.* which is greater then the laſt Remainder 1 *li.* 7 *s.* 11 *d.* by 1 *s.* 4 *d.* Therefore it being taken from the ſaid 1 *li.* in the head of the Table, there remaines 18 *s* 8 *d.* This being added vnto the former 20 *l.* and 7 *l.* makes in all 27 *l.* 18 *s.* 4 *d.* And ſo much is ſuch a Rent, or yearly penſion of 7 *l.* in ready money worth, to endure for 5. yeares to come.

Moreouer according to the ſame direction you ſhall finde that a Leaſe of 40 *l. per Annum* to endure for 5. yeares, to be ſold preſently for ready money, is worth 159 *l.* 16 *s.* 8 *d.* And ſo of all others in the like kinde.

By the ſame order you may know the increaſe of any ſumme, greater then is in the ſaid Table.

Now for your better vnderſtanding, and more copious
vſe of this Table, obſerue the Examples following.

1. *Example.*

A. B. hath an annuity of 30 *li. per Annum*, to endure
for 6 yeares, *E. F.* hath 26. *l.* cleare Rent, *per Annum*,
payable for 9 yeares; now if you would know which of
them is the better in value, and how much, worke them
both ſeuerally, as you are directed in the Rent or Annuity
of 1 *l*, and as by the Operation hereafter ſet downe, ap-
peareth. And you ſhal find the 30 *l.* Annuity to be worth
138 *l.* 13 *s.* 9 *d. ob.* and the 26 *l.* yearely Rent to be worth
162 *l.* 8 *s.* 7 *d.* So that if you deduct the Leſſer from the
Greater, it appeares that the Rent is better then the An-
nuity by 23 *l.* 14 *s.* 9 *d. ob.*

The Termes, with the Act, or Commencement dayes in both *Vniuerſities*, Oxford and Cambridge.

Hillary Tearme beginneth in both, *Ianuary* 14. and
endeth at *Oxford Aprill* 1. At *Cambridge March* 29.

Eaſter Tearme begins in both, *Aprill* 19, ends at *Ox-
ford May* 25. At *Cambridge* Iuly the 4.

Trinity Tearme begins at *Oxford*, Iune the 7, and ends
the 6 of Iuly: But may be prorogued, *ad magiſtrorum
bene placitum.*

Michaelmas Tearme in both begins, October the 11.
and ends December the 16.

Act of Bachilours in both, is the firſt day of Lent.

Act of Maſters in *Oxford*, is Iuly the 8. In *Cambridge*
Iuly the 3.

The

		li.	*s.*	*d.*	*q.*	Summes to be disbursed
30 *li.* Annuity with the increase for 6 yeares		220.	1.	5.	3.	
The summe next in value (which is vnder 100 *li.* Principall) to be substracted from it —		158.	13.	8.	0	100 *li.*
The Remaine		—61	7	9	2	
The summe next in value (which is vnder 30 *li.* Principall) to bee substracted from it—		47	12	1	0	30 *li.*
The Remaine		—13	15	8	2	
The Summe next in value (which is vnder 8 *li.* Principall to bee substracted from it. —		12	13	9	3	8 *li.*
The Remaine		—1	1	10	3	
The Summe next in value aboue it (which is vnder 1 *l.* Principall) —		—1	11	7	3	
Whereof 2 thirds are		—1	1	1	0	13 *s.* 4 *d.*
The Remaine of 1 *li.* 1 *s.* 10 *d.* 3 *q.* the said thirds being substracted. —		—0	0	9	3	

For which being about the 41 part of 1 *li.*
11 *s.* 7 *d.* 3 *q* you may allow about the fortieth part of 1 *li* viz.

	s.	*d.*	*ob.*

Totall, 138 *li.* 12 *s* 9 *d. ob.*

2 *Example.*

An extent being sued foorth vpon a house and land for 50 *li.* debt, the same is to be rayted by 10 *li.* per *Annum.* Now the honor of the Premises desiring to buy out this with ready money : the question is, how much money will serue for that purpose.

To resolue this Question, consider, that 50 *li.* will be payd in 5 yeares by 10 *li. per Annum.* Therefore you are to finde what 10 *li.* a yeare, for fiue yeares is worth in ready money; which if you follow my former direction, will appeare to be 39 *li.* 18 *s.* 5 *d.* and the same is the value of the Extent.

3. Example.

Iules Roe taketh a Lease for 15. yeares, at 9 *li.* yearely Rent, who after the expiration of 7 yeares, would pay a Fine, and bring downe the Rent to 6 *li. per ann.* for the residue of the terme.

To resolue this question, from 15 yeares abate 7. expired, and the time to come will be 8. yeares. Also deduct from the present Rent 3 *li.* and their remaineth 6 *li.* Therefore you are to finde what 3 *li.* Rent *per Ann.* for 8 yeares is worth in ready money, which by persuing, my former directions will appeare to be 14 *li.* 9 *s. ob.*

3 Barly Cornes make an Inch, 12 Inches makes a foote, 3 foote to the yeard, 16 foote and a halfe make a Pole or Perch, this Pearch in some places is 18 foote, in some places 21 foote; Of this 40 in length and 4 in breadth makes an Acre of Land, or Roode, which is 125 paces to the Furlong, euery Pace 5 foote: the foote is 4. pames and euery pame 4 fingers breadth; a Fingers breadth is 4 Barly Cornes close together.

A Table of English miles.

The vse of this Table.

First, a man may know how to take money vpon Rebatement after 8 in the hundred.

Secondly, any man that buyes or sels vpon time, may know how much he gaines by taking, and how much he looseth by giuing of time: and diuers other beneficiall vses appertaine to the same Table.

As for example.

If a Twelue months time be giuen for the payment of 460 *l.* and at the end of 6 Months, the Creditor desires to haue his money vpon Rebatement of 8 *l. per* 100 *l.* how much money must he receiue.

First, I seeke out in the side of the Table 400 *l.* and the 6 months in the head of the Table, and right against the said 400 *l.* and right vnder 6 monthes, I finde 15 *l.* 7 *s.* 8 *d.* 1 *q.* which must be rebated in the 400 *lis.*

Secondly, I seeke in like manner for the rebatement of 60 *lis* for 6 monthes, and finde it to be 2 *l.* 6 *s.* 1 *d.* 3 *q.* which with the former 15 *l.* 7 *s.* 8 *d.* 1 *q.* makes 17 *l.* 13 *s.* 10 *d.* which being taken from the principall summe, to wit, 460 *lis.* there will remaine 442 *l.* 6 *s.* 3 *d.* the summe of money that ought to be receiued, allowing 6 monthes rebatement according to 8 *li. per cent.* And thus of any other payment in the like kinde, &c.

COurteous Reader for thy better vnderstanding, in the Table of good Husbandry, Page 2. *account from* 1 li. *to* 1000 li. *by the Weeke, and not by the Day: For if you count by the Day,* 1 li. *a Day is* 365 li. *a Yeare, and* 1000 li. *a Day is* 365000. li. *a Yeare and so of the Rest from* 1 l. *to a* 1000.

The

1 Sacke of cleane Woole makes of Sorting Cloathes 4 Standard Cloathes.

Euery Cloath weighes 60 *li.*

The length of euery Cloath 24 yards of 6 quarters and a halfe broad, or there abouts, with the Remedy or allowance of 2 *li.* weight vpon a Cloath.

Obserue in the weight to be well Scowred, Thicked, Milled, and well Dryed,

Obserue in measure the { Yeard & Inch } within the Lift.

For breedth and the restvse this Table, but alwayes obserue the Weight is to be more regarded then the Measure, for the Measure is abused by stretching.
